Dear Mr. Gowers,

Please find attached Edison Wetlands Association's (EWA) June 15, 2017 surface water sampling data from the discharge we discovered into Park Brook, a map showing EWA's sampling locations, and site inspection photos. Also attached is the memo technical advisor Dr. Peter deFur prepared with EWA and presented at the June 19th CAG meeting. Please respond to each comment and recommendation made in the memo in writing by Friday, July 7th, and let me know if you have any questions.

Did EPA conduct data verification and validity analysis of the Cornerstone "Ringwood Mines/ Landfill Superfund Site February 2017 Groundwater, Mine Water, and Surface Water Sampling" report? I would appreciate a response via email by Monday, July 3rd.

Respectfully,

Shannon Lisa  
Program Director  
Edison Wetlands Association
